INFO (ADEXL-1705): The requested reference value '69u' of parameter 'w_n' is not in the design space. The value '69u' will be used for a reference point instead.

The specified parameter will be adjusted by ADE XL in order to optimize the design. However, the reference point that ADE XL will use is not one of the available values that have been configured. You may want to either adjust that parameter's settings to include the reference value, or adjust the reference value to exactly match one of the possible values.

INFO (ADEXL-1705): The requested reference value '241u' of parameter 'w_p' is not in the design space. The value '241u' will be used for a reference point instead.

The specified parameter will be adjusted by ADE XL in order to optimize the design. However, the reference point that ADE XL will use is not one of the available values that have been configured. You may want to either adjust that parameter's settings to include the reference value, or adjust the reference value to exactly match one of the possible values.
